

What is claimed is:

1. A retrieved telephone number displaying method for a portable telephone set for retrieving telephone numbers and other data registered in the portable telephone set and displaying the retrieved data in a display of the portable telephone set, wherein data retrieved in a predetermined sequence is displayed together with the total number of cases of the retrieved data and the predetermined sequence.

2. The retrieved telephone number displaying method for a portable telephone set according to claim 1, wherein the data retrieved in the predetermined sequence is rearranged in a sequence of greater numbers of times of utilization and displayed in the sequence of greater number of times of utilization together with the total number of cases of the retrieved data and the rearranged sequence.

3. The retrieved telephone number displaying method for a portable telephone set according to one of claims 1 and 2, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method.

4. A retrieved telephone number displaying system for a portable telephone set for retrieving telephone

numbers and other data registered in the portable telephone set and displaying the retrieved data in a display of the portable telephone set, wherein data received in a predetermined sequence is displayed together with the total number of cases of the retrieved data and the predetermined sequence.

5. The retrieved telephone number displaying system for a portable telephone set according to claim 4, wherein the data retrieved in the predetermined sequence is rearranged in a sequence of greater numbers of times of utilization and displayed in the sequence of greater number of times of utilization together with the total number of cases of the retrieved data and the rearranged sequence.

6. The retrieved telephone number displaying system for a portable telephone set according to claim 4 or 5, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method.

7. A portable telephone set comprising a CPU, a memory for storing such data as telephone numbers and names, and a display for storing the stored data, wherein the CPU retrieves the data stored in the memory in a predetermined sequence, and displays the data retrieved in the predetermined sequence on the display of the portable

telephone set together with the total number of cases of the retrieved data and the predetermined sequence.

8. The portable telephone set according to claim 7, wherein the data retrieved in the predetermined sequence is rearranged in a sequence of greater numbers of times of utilization and displayed in the sequence of greater number of times of utilization together with the total number of cases of the retrieved data and the rearranged sequence.

9. The retrieved telephone number displaying method for a portable telephone set according to claim 7 or 8, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method.
